DJECT BY E HITECTURE OFFICE] ELII is an architecture firm founded in Madrid in 2006 by Uriel Fogué, Eva Gil, BLOCK and Carlos Palacios. Their professional practice also encompasses teaching and research, and

riangle the firm has received international recognition from various media outlets and institutions. BIO 01 They teach at the Escuela Técnica Superior de Arquitectura de Madrid (ETSAM, UPM) and have been visiting lecturers at the École Polytechnique Fédérale de Lausanne (EPFL). elii was present in the Spanish Pavilion at the 15th Venice Architecture Biennale (which earned the 2016 Golden Lion). Among other awards, two of their works have been selected for the European Union Prize for Contemporary Architecture - Mies Van Der Rohe Award (2015, 2019). They received First Prize from the College of Architects of Madrid (2017) and have won the COAM Prize for various projects on another five occasions (2018, 2017, 2016, 2013, 2011, 2006). They were also awarded the FAD Award (2020, 2005 - Opinion Award) and three of their other works made the FAD shortlist of finalists and selected projects (2017, 2018, and 2020). Their work Yojigen Poketto was selected as one of the 20 visionary domestic spaces of the last 100 years at the exhibition Home Stories 100 Years, 20 Visionary Interiors at the Vitra Design Museum in Weil am Rhein (2020). They are the authors of several books: Super Petites Maisons (EPFL, 2022) and What is Home Without a Mother (HIAP - Matadero Madrid, 2015), which won an award at the 13th Biennial of Spanish Architecture and Urbanism in 2015. They also co-authored the book "Traspasar los límites" (CentroCentro, 2020). They are co-editors of the publication UHF, which is part of the Creators Archive of Madrid. Their article "Technifying Public Space and Publicising Infrastructures: Exploring New Urban Political Ecologies through the Square of General Vara del Rey", published in the "International Journal of Urban and Regional Research" (IJURR) and covering part of their research, was recognised as one of the most outstanding articles in forty years of the journal's history. They are regular participants in the Political Fictions Crisis Cabinet and have lectured and taken part in reviews and workshops at many prestigious international universities and institutions. MAKiA BLOCK 13 BIO 02

MARÍA JEREZ (1978, Madrid). María Jerez's work travels "between" choreography, cinema, and visual arts. Since 2004, her work has explored the relationship with the spectator as a space where modes of representation are thrown into crisis. From El Caso del espectador to her most recent works, this relationship has mutated from a place of "understanding" of theatrical and cinematographic conventions to the intentional loss of references, where the artist, the piece, and the spectator behave as strangers to one another. In her latest work, she has focused on opening spaces of potentiality through encounters with what we find strange and alien. Her most recent piece explores the performativity of the encounter as a space of transformation. In this process of transformation, the "other" is situated within oneself, blurring the boundaries between the known and the unknown, the object and the subject, the animate and the inanimate, the collective and the individual. In her work, she aims to cast off logocentric and anthropocentric mindsets, Human knowledge becomes vulnerable to other enigmatic, complex ecosystems. This research has given rise to pieces such as A Nublo (2021) in collaboration with Edurne Rubio, The Stain (2019), Yabba (2017), Maria Goes to School (2015-18), and Blob (2016) as part of her project What Is Third; the exhibitions La Mancha (2021) and Yabba (2018); and the films "The Boogie-Woogie Ghost" (2018) and "Puebla" (2020), both in collaboration with Silvia Zayas. She combines her artistic work with educational, curatorial, and editorial projects.

MAIO

MAIO is an architecture firm that combines architectural production with research and editorial work, focusing on the study of domestic typologies that challenge the notion of public and private spheres, and analysing and reformulating the social and political structures that are implicit in the built environment. Their research projects include The Diffuse House, Kitchenless City, Kitchenhoods, and Rebel Kitchens, where they analyse the role of domesticity in forging identities and social roles, showcasing past and present architectural projects able to dismantle the social asymmetries perpetuated through architecture. MAIO has lectured at the Barbican Center, GSAPP-Columbia University, RIBA, UC Berkeley, and Whitney Museum, among other places, and their work has been exhibited at venues such as the Metropolitan Museum of Modern Art, Guggenheim Bilbao, Art Institute of Chicago, and Storefront for Art and Architecture. MAIO is run by Maria Charneco, Alfredo Lérida, Guillermo López, and Anna Puigjaner.

AGNES ESSONTI LUQUE AGNES ESSONTI LUQUE (b.1996) is a Cameroonian and Spanish artist from l'Hos-pitalet de Llobregat. With a strong connection to her African roots, she grew up in a multicultural environment that has greatly influenced her work. Essonti's educational background reflects her passion for the arts and culture. She holds a Diploma in Photography from KCC in London, a PhD in Culture and ____ CREDIIS_____ Philosophy of Black Peoples from UCM in Madrid and an MA in Photography from Blank Paper in Madrid. Her practice BLOCK 16 MAIO: María Charneco, Alfredo Lérida, explores crucial topics such as Afro-diasporic identities and culture. She uses a wide range of media, including Guillermo López, Anna Puigjaner performance, video, and photography, to create pieces that serve as catalysts for her ongoing research into these MUSIC: Megane Mercury subjects. Through her work, Essonti seeks to reconstruct her own memories and offer new perspectives on complex AUDIOVISUAL PRODUCTION: NKL Fleiva Films issues. Her artistic vision is strongly influenced by decolonial processes and activism, reflecting her deep com-PARTICIPATING COLLECTIVES: Plataforma mitment to these causes. Essonti's work has been shown at international exhibitions, including 1384 Days Wide at Aprofitem els Aliments PAA, Sindihogar/ Rencontres de Bamako 2015, 14th Dakar Biennale OFF, and XI Bienal de Arte de Lanzarote. She has performed at the Sindillar. Cooperativa Abarka Thyssen-Bornemisza National Museum and will perform at the Museo Nacional Centro de Arte Reina Sofía in early 2023.

BIO

liente Oriol, and Gonzalo Valiente Oriol. Their work delves into late-capitalist spaces and narratives to identify, through critical analysis, and challenge, through exercises in political imagination, the mechanisms that veil and normalise neoliberal violence. GRANDEZA STUDIO operates as a praxis of blurred outlines structured around three interdependent strands: academic research, critical spatial practice, and education. Their project "Teatro Della Terra Alienata: Re-imagining the Fate of the Great Barrier Reef" (where they were creative co-directors along with BAJEZA) represented Australia at the 22nd Milan Triennale, where it received the Golden Bee Award for the best international contribution. The work was acquired in 2021 by the National Gallery of Victoria (NGV) for the museum's permanent collection of Contemporary Design and Architecture. In 2022, GRANDEZA STUDIO published a book of the same name with Bartlebooth and presented it at NGV as part of Melbourne Design Week 2022. GRANDEZA STUDIO's work has been exhibited and published in Germany (Bauhaus Dessau in 2014); the USA (1st Chicago Architecture Biennial in 2015); Chile (20th Chilean Biennial of Architecture and Urbanism in 2017, and Campus Creativo at Universidad Andrés Bello in 2022); Spain (14th Spanish Biennial of Architecture and Urbanism in 2018, and Arts Santa Monica in 2022); Italy (22nd Milan Triennale in 2019); the Netherlands (Bureau Europa in 2019); and Australia (Mildura Arts Centre in 2016, Wagga Wagga Art Gallery in 2017, Bank Art Museum Moree in 2018, Tin Sheds Gallery in 2018, Australian Design Centre in 2018, MADA Gallery in 2020, and National Gallery of Victoria in 2022). LOCUMENT BLOCK BIO 02

LOCUMENT is a research studio that combines filmmaking with architecture and urban research. They use architecture and film as analytical, critical and subversive tools to emphasise contemporary issues and dissect their resolutions. They see the importance of observing rapidly changing social conditions through the influential factors of technology, economy, politics and urban environment. Drawing from contemporary scenarios, Locument travels to unique locations to base their research topics, finding in them situations that, while site-specific, reflect problematics that resonate throughout the globe. Bringing out these underlying stories, their work focuses on recreating the complex storyline hidden under the surface of the visible spectrum. In a world moving exponentially faster, they see the importance of slowing down, researching, analysing, documenting and capturing a network of often contradictory points of view, thus revealing the narratives that influence our reality. Locument envisions the future and the past, and not the least, our time. Locument's movies have been screened internationally at exhibitions and film festivals such as - the 15th International Architecture Exhibition of La Biennale di Venezia, Italy; the 25th Biennial of Design Ljubljana, Slovenia; Arquiteturas Film Festival Lisbon, Portugal; Archstoyanie Festival Festival at the Nikola-Lenivets Art Park, Russia; In-Between Conditions Media Art Festival Tbilisi, Georgia; Commiserate Chicago Media Art Festival, US and Architecture Film Festival, Rotterdam. They have collaborated with institutions such as MIT Architecture Department (Cambridge, US), INDA - Chulalongkorn University Faculty of Architecture (Bangkok, Thailand), The Bartlett School of Architecture, Bartlett Prospective (London, UK) and MAXXI The National Museum of XXI Century Arts (Rome, Italy). Locument was founded in 2015 by Francisco Lobo and Romea Muryn

BLOCK 08 DESCRIPTION 02 This ruthless impenetrability could explain many of the attitudes towards these ecosystems, which are so fundamental for our existence. On the one hand, the fiction of the ground as a dividing line – between life and death, BLOCK visible and invisible, or between past, present, and future – has turned soil into a receptacle of crimes, memories, and wretchedness, and a space for imagining underworld mythologies. On the other hand, foundational civilisational myths such as belonging, fertility, production, and reproduction have also been projected onto the soil. 02 PP. G0

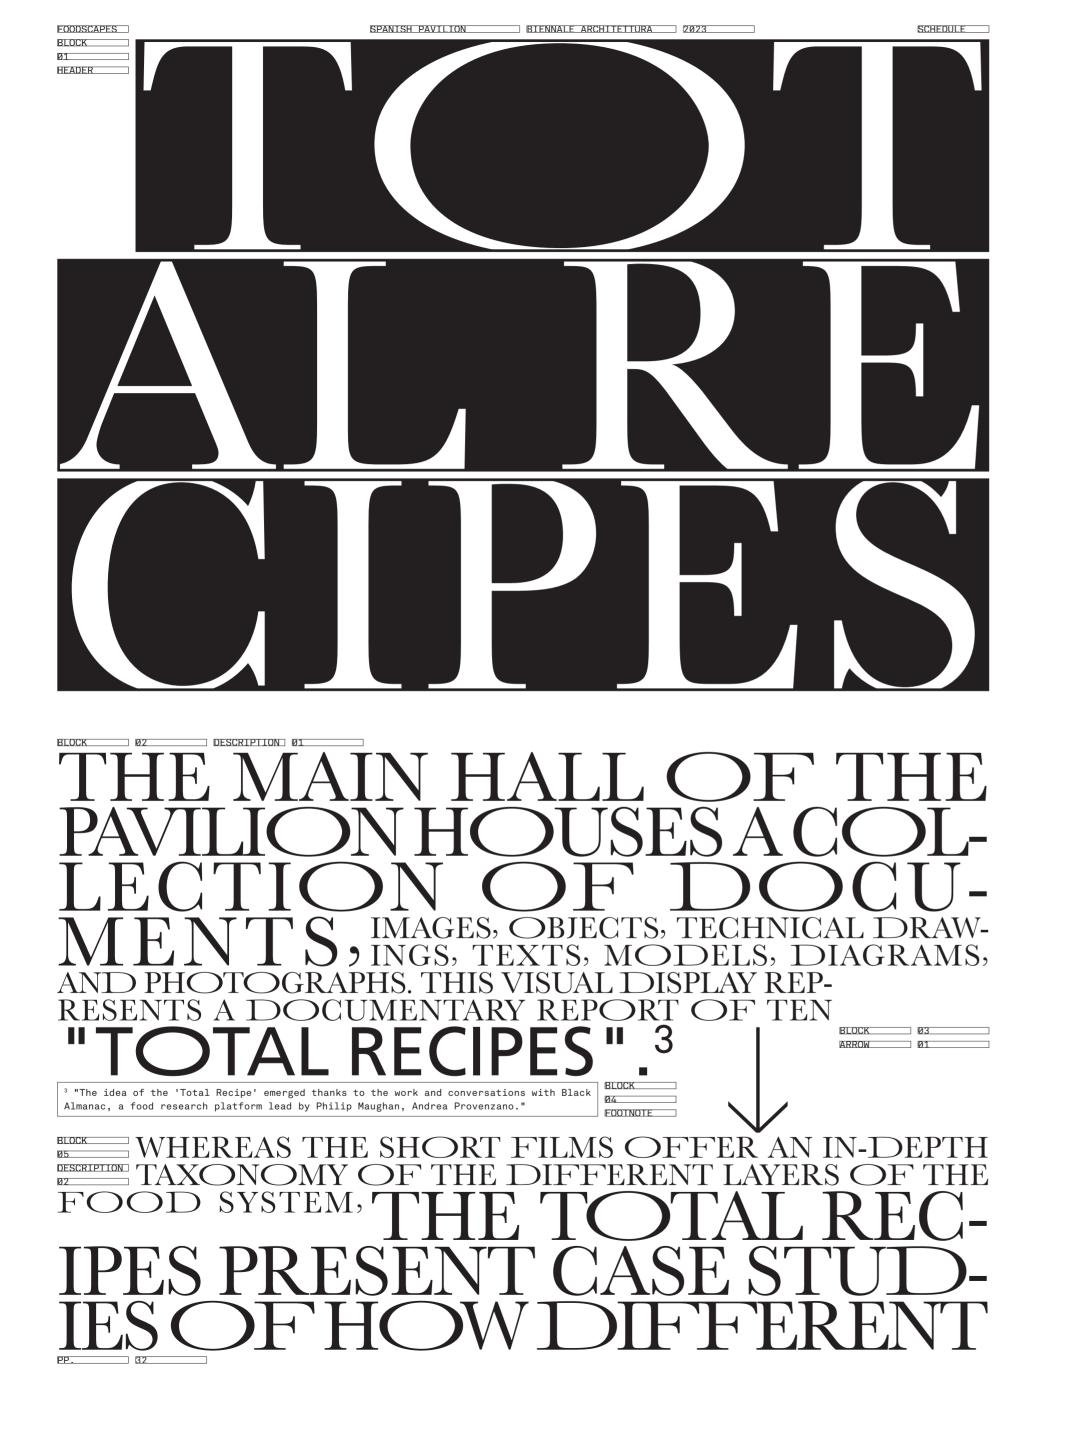

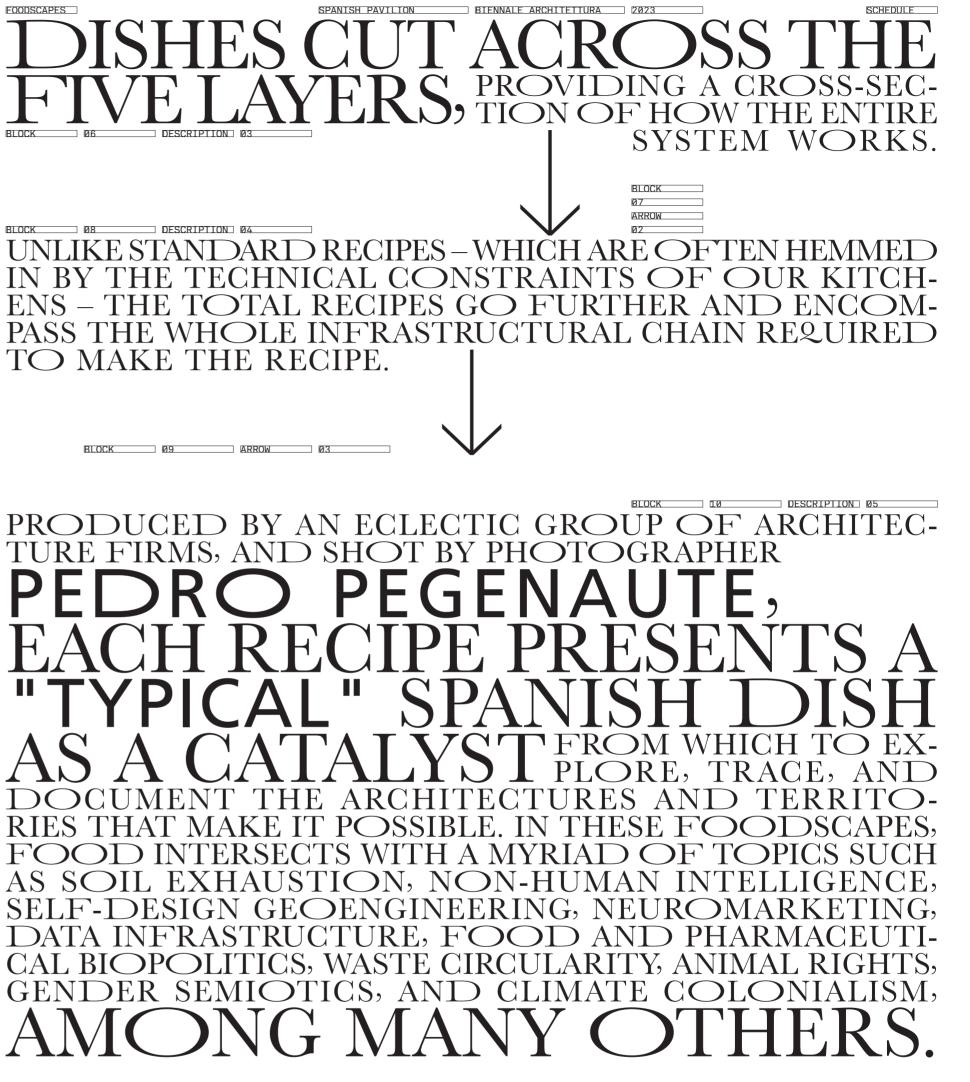

BLOCK 15 IMAGE Ø1

BLOCK 16 DESCRIPTION 05 Within a transient film set design, four mysterious agents appropriate the paraphernalia of scientific laboratories and archaeological digs, rearranging their aesthetics of truth and forensic precision into dialectical weapons for political imagination. "Strata Incognita" invites audiences to envision alternative ways of cultivating our relationship with soils and to unlearn the epistemic assumptions that sustain our hyper-extractive relationship with these hidden worlds that are as close as they are strange to us.

BLOCK 11 PHOTOGRAPHER

PEDRO PEGENAUTE, born in Pamplona in 1977, has worked as a professional photographer specialising in architecture since 2005, when he set aside his career as a building engineer to devote himself fully to photography. Since then, he has worked with architects and publishers (books, magazines, blogs) of renowned national and international prestige. He has received various awards in photography contests recognizing his particular point of view: first prize Colegio Oficial de Arquitectos Vasco-Navarro (2005); first prize "Miradas desde la Arquitectura" (2011) Instituto Alicantino Juan Gil-Albert; finalist "Purificación García 2007" and work selected and acquired to be included in both the exhibit later held at the Círculo de Bellas Artes (Madrid) and the private collection of this brand. Additionally, he has been on the panel of judges for various photography contests. His work has been included in numerous architectural exhibits in cities including Barcelona, Tokyo, Los Angeles, New York, London, and more, and his personal work has been shown in individual exhibits since 2003, when Pegenaute's work began to be acquired by individuals and for private collections. He has also been commissioned to create numerous large-scale murals for interior spaces.

C+ ARQUITECTAS (NEREA CALVILLO WITH MANU ALBA MONTES AND MARÍA BUEY GONZÁLEZ) is a spatial design and research practice founded by Nerea Calvillo and based in London and Madrid. The firm's environmental mediations, commissioned by the Royal Academy of Arts, the Seoul Biennale of Architecture and Urbanism, and the Madrid local government, explore the material, social, and political entanglements between the climate crisis and the spaces we live in. Calvillo is an architect, lecturer, and researcher working at the intersection between spatial design, ecological future, environmental pollution, and feminist-queer theory and methods. She is the author of Aeropolis: Queering Air in Toxicpolluted Worlds, and an associate professor at the Centre for Interdisciplinary Methodologies, Warwick. María Buey González and Manu Alba Montes joined C+ for Receta Total. Alba is an architect, designer, DJ, and multidisciplinary artist. His explorations of the role of the digital image in building subjectivities, imaginaries, spaces, and memories have been exhibited at numerous clubs and art institutions. Buey is an architect who works on the implications of automation and computational technologies for the built environment. She was a 2021 fellow at The Terraforming, Strelka Institute. PP. 40

COMMON ACCOUNTS is a conceptual design office based in Toronto and Madrid. Founded by Igor Bragado and Miles Gertler in 2016, the firm works on architecture, visual art, and academic inquiry and shifts between planetary, psychic, and physiological scales. Investing in the immediate present, Common Accounts studies situations in which design intelligence, though abundant, passes under the radar, often looking only a few seconds into the future. PP. 41

01 RECIPE

This recipe serves two complementary purposes: ON THE ONE HAND, IN LINE WITH THE FILIPI-NO PRACTICE OF PAGPAG RESTAURANTS, IT RE-USES TABLE FOOD 'OVERS THAT WOULD OTHERWISE GO TO WASTE. ON THE OTH-ER, IT EMPLOYS PRODUCTS OF FERMENTATION OR AUTOLYSIS. The basic ingredients of this recipe, which have already been partially digested in other gastric processes, are flavoured condiment: garum sauce, also known as garo

BEING ORIGINALLY ROMAN AND WII THE WHCOLE EMPIRE BY ALL SC PART AND PARCEL OF THE EUROPEAN CULINARY TRADITION While the original production method of fermenting fish guts under layers of salt had been lost, recent culinary-archaeological studies have once again made it popular.

_____ This recipe is made by cleaning the French fries and squashing them into a smooth mash, blending in some garum sauce for plasticity. The mash is worked 💷 into thin, flat patties and set aside. The salad is then washed under cold water, dried in a centrifuge, and also set aside. The black olives and auber-DESCRIPTION gines are lightly baked. The aubergines are cut into strips and marinated in a mixture of garum, soy, red pepper and oil inside an air-tight food storage bag for at least three hours. The fish is finely minced, and the hones fried and ground. This is mixed with a light mayonnaise sauce from the recovered packets. Finally, the potato patties are worked into a slightly puffed shape, fried, and drained. The dish is presented by extending the sardine paste in the shape of your choice and placing two of the patties on a bed of salad dressed with garum and oil. Strips of marinated aubergine and baked black olives are used for decoration.

BLOCK 07 BIO 01 FEDERICO SORIANO graduated in Architecture from the ETSAM-UPM in 1986, was awarded a PhD in Architecture by UPM in 2002, and is the current Chairman of the Department of Architectural Design at UPM, with 24 years' officially recognised research experience.

BLOCK 08 BIO 02 DOLORES PALACIOS graduated in Architecture from ETSAM-UPM in 1987, earned her PhD in Architecture from the UPM in 2012, and is now a Professor of Architectural Design at the Universidad Alfonso X el Sabio, with 12 years' officially recognised research experience. Both began their professional practice in 1986 and have been partners of the S&Aa architecture firm since 1992. They were awarded the Enric Miralles Award for Architecture in 2001 and the Via Arquitectura Award in 2007. Their built works include the Euskalduna Jauregia (Bilbao), Urban Hall (Bilbao), Ecochimneys (Madrid), the Plaza Bizkaia Bilbao administrative building, and the MEGA Estrella Galicia Museum. Their ongoing projects include: CEXMA headquarters (Mérida, Badajoz), the Gogora pavilion (Bilbao), Puerto de Canfranc square (Madrid), and the Fuente Santa spa (La Palma). Their award-winning designs for competitions include the New Taipei City Museum of Art Conceptual Design, the Laminar Tower (Barcelona), and the Málaga Auditorium. From 2017 to 2022, and from 1991 to 1993, Federico Soriano was editor of the Arquitectura COAM journal published by the Madrid College of Architects. He and Dolores Palacios are editors of the "Fisuras de la cultura contemporánea" journal and together founded the Encoger movement in 2009. PP. 43

VOY A NARRAR UNA PELÍCULA TUYA FORMA INVERTIDA. ACABAS DE DESAYUNAR; AHORA VOY PROYECTAR LA IMAGEN EN SENTIDO INVERSÓ, Y TODA LA COMIDA SALE DE TU BOCA HACIA EL PLATO LOS PLATOS BANDEJA Y LAS COSAS VUELVEN SARTEN. LA LA NEVERA: SALEN DE LA NEVERA VUELVEN Α TIENDA Y LUEGO. DESDE LATAS Y LUEGO VUELVEN A LA VUELVEN AL DISTRIBUIDOR. TIĘNDA, LUEGO VUELVEN A FÁBRICAS DONDE SE HAN EMPAQUETADO. LUEGO Y A LOS BARCOS, Y FINALMENTE LOS CAMIONES VUELVEN LAS PINAS EN HAWAI. ENTONCES LAS PINAS SE SEPARAN, VUELVEN AL AIRE; LAS GOTAS DE LLUVIA VUELVEN AL CIELO Y ASÍ SUCESIVAMENTE. PERO EN UNA INVERSIÓN ACELERADÁ DE UN MES, PRÁCTICAMENTE TODO LO QUE HAS IDO CONSU-MIENDO HASTA AHORA, CONVIRTIENDOSE GRADUALMENTE EN TU PIEL, TU PELO, ETC., HACE UN MES NO ERA MÁS QUE AIRE QUE SOPLABA ENTRE LAS MONTAÑAS. EN OTRAS PALABRAS DESENSAMBLAS COMPLETAMENTE. QUIERO QUE PIENSES EN TI MISMO DE ESTA MANERA. SI TUVIÉRAMOS ALGUNA FORMA DE PONER RASTREADORES EN LAS IMÁGENES, VERÍAS LOS ELEMEN-TOS QUÍMICOS APROXIMARSE GRADUALMENTE Y, FINALMENTE, METERSE EN ESOS DIVERSOS LUGARES VEGETALES, Y EN ASA-DOS, CADA VEZ MÁS APRETADOS, EN LATAS, EN LA TIENDA. LLEGANDO FINALMENTE A SER SOLO TU O YO, CONVIRTIENDOSE TEMPORALMENTE EN MI PELO, MI OREJA, ALGUNA PARTE PIEL, HASTA QUE AL FIN TODO ESO SE DESPRENDE ARRASTRADO POR EL VIENTO EN FORMA DE POLVO. CADA UNO DE NOSOTROS NACEMOS SIENDO UN MODELO DE INTEGRACIÓN BLOQUE Ø2 SUMAMENTE COMPLEJO. FLECHA 01 BLOQUE DESCRIPCIÓN 02

El texto que acabas de leer fue escrito en el año 1982 por el arquitecto Richard Buckminster Fuller. Ahora te invitamos a pensar los escenarios donde estas escenas han tenido lugar y a reflexionar sobre las arquitecturas e infraestructuras que los construyen; en el laboratorio cotidiano de nuestras cocinas, donde tu desayuno se ha desplegado en ingredientes y reensamblado en latas y envases, y en la centralidad social y política que este espacio ostenta en nuestras arquitecturas domésticas. Ahora piensa en el supermercado al que regresan, donde se ubican de forma estratégica en estantes meticulosamente ordenados para evocar el deseo de consumo de determinados materialismos culinarios; de ahí piensa en las autopistas y carreteras, y en los anodinos bares y hoteles de sus áreas de descanso, urbanismos dispersos habitados por autonautas nómadas que custodian la ruta invertida de nuestros alimentos hacia los paisajes automatizados de nuestros puertos y centros logísticos, donde ecologías maquinizadas las reorganizan para devolverlas a su lugar de origen. Piensa en las plantaciones, invernaderos y mataderos a los que retornan, urbanismos blandos diseñados para instrumentalizar territorios enteros. Piensa en los cuerpos -humanos, vegetales, BLOQUE animales, mecánicos...- que allí se explotan y las en las implicaciones políticas, tecnológicas y ecológicas de las arquitecturas l productivas que lo hacen posible. Por último, piensa en la tierra donde se reabsorben y en el proceso casi alquímico que permite a 二 lo biológico volver a ser geológico. Piensa en la fotosíntesis, en la fijación del nitrógeno, en metabolismos microbianos y en los FLECHA] complejos procesos físicos y químicos necesarios para fosilizar el sol en una infinita variedad de texturas y sabores. 02

BLOQUE AL COMER, DIGERIMOS TERRITORIOS. FOODSCAPES UN VIAJE A LAS AR-MENTAN EL MUNDO, DE LOS LABORATORIOS DOMÉSTICOS DE NUESTRAS COCINAS A LOS VASTOS PAISAJES OPERACIONALES QUE NUTREN NUESTRAS CIUDADES. En un momento en que los debates sobre energía son más pertinentes que nunca, la comida permanece en un segundo plano y, sin embargo, la manera en que la producimos, distribuimos y consumimos moviliza nuestras sociedades, moldea nuestras metrópolis y transforma nuestras

geografías de forma más radical que cualquier otra fuente energética. A través de un proyecto audiovisual de cinco películas, un archivo a modo de recetario y una plataforma de investigación abierta al diálogo con el público y con expertos, FOODS- BLOQUE CAPES explora el contexto agroarquitectónico español —motor alimentario de Europa— para examinar el panorama Ø6 actual de nuestros sistemas alimentarios y las arquitecturas que los construyen. Al hacerlo, miramos hacia el ELECHA futuro y nos preguntamos por otros modelos posibles; unos capaces de alimentar al mundo sin devorar el planeta. 🛛 🛛

BLOQUE BLOQUE BLOQUE Bunque pueda parecer lo contrario, FOODSCAPES no trata sobre la comida, sino sobre las implicaciones BUSCRIPCIÓN ignoradas arquitecturas e infraestructuras que posibilitan tales procesos: supermercados, invernaderos, BLOQUE granjas, cocinas, almacenes, redes logísticas, cadenas de frío, vertederos En lugar de pensar en todas estas "arquitecturas bastardas" como elementos independientes (es decir, las arquitecturas del sistema alimentario), proponemos verlas como un todo coherente (el sistema alimentario como arquitectura); como una megaestructura metabólica distribuida que media el reensamblaje molecular de los paisajes terrestres en agentes biológicos sensibles: nosotros. Pero si es así, si todo el sistema agroalimentario es una arquitectura, ¿cuál es su anatomía?	 BLOQUE BLOQUE BLOQUE BLOQUE BLOQUE BLOQUE BLOQUE Cuántos kilómetros recorren los alimentos antes de llegar a nuestros platos? A pesar de nuestros vanos esfuerzos por convertirnos en locávoros, los sistemas alimentarios siguen firmemente enraizados en un paradigma globalizado. Cada día, la intrincada arquitectura logística que da forma a esta cadena de suministros distribuye miles de millones de calorías y conecta nuestros pladares a una infinidad de temas y lugares remotos, como los paisajes automatizados de los puertos de mercancías o la mano de obra precaria que sustenta la economía gig de las plataformas de reparto. Este capítulo explora la relación entre comida, movimiento y su compleja interacción con diversas fuerzas infraestructurales, económicas y tecnológicas; desde la red mediada de forma climática que constituye las cadenas de frío, hasta los regímenes estéticos que dotan de movimiento a los alimentos para desencadenar el irresistible deseo que los conduce a nuestras mesas.
FICULE FOUNDATION, PRODUCTION, DISTRIBUTION, FOUNDATION, PRODUCTION, DISTRIBUTION, FOUNDATION, DISTRIBUTION, FOUNDATION, DISTRIBUTION, FOUNDATION, DISTRIBUTION, FOUNDATION, DISTRIBUTION, FOUNDATION, CONSUMPTION, DISTRIBUTION, FOUNDATION, CONSUMPTION, DISTRIBUTION, FOUNDATION, FOUND	RUTA FRÍA FIQUE &I IIIUIO Ø3 POL ESTEVE CASTELLÓ + GERARD ORTÍN CASTELLVÍ BLOQUE Ø3 DESCRIPCION I4 BLOQUE Ø2 Ruta Fría explora las relaciones entre zonas climáticas, infraestructuras y distribución alimentaria en el sur de Europa. La película conduce al espectador por los paisajes publicitarios, tecnológicos y de transporte que constituyen las rutas de distribución de alimentos perecederos. BLOQUE MENONE 45 DESCRIPCION I5 ELECHA Las geografías térmicas que han estructurado históricamente los intercambios comerciales favorecen, en el presente, los flujos de alimentos desde el sur hacia el norte. Las carreteras del litoral Mediterráneo, que contribuyeron a popularizar la península como destino turístico a partir de la década de 1960, se han consolidado hoy como las principales vías de exportación de alimentos. Una nueva "ruta desde el sol" distribuye la mercancía hortofrutícola y ha convertido la vía E-15 en uno de los tres ejes prioritarios para el transporte de mercancías en el continente.
ELCOLVE 12 ELECHA 06 ELCOLVE 14 EPISODIO 01 ELCOLVE 15 DIGESTION DESCRIPCION 06 01 DICESCRIPCION 06 01 Cuando comemos, no somos los únicos involucrados en el proceso de digestión. La ONU calcula que alrededor del 17 % de los alimentos que producimos acaban en la basura. Aquí, junto con los subproductos de nuestros propios procesos digestivos, los desechos inician un viaje invisible a través de los serpenteantes intestinos subterráneos de nuestras ciudades. Es en estos lugares ocultos donde se establecen los contratos entre los espacios urbanos y las ecologías que los sustentan. En este capítulo nos adentraremos en el recorrido invisible que emprenden nuestros alimentos cuando los desechamos como residuos. Exploraremos las intrincadas y a menudo ocultas infraestructuras que gestionan y metabolizan estos materiales, revelando el complejo enredo de sistemas urbanos y ecológicos que subyace en nuestra vida cotidiana.	BLOQUE 67 DESCRIPCIÓN 16 La dualidad frío-calor ha sido también un factor clave para la producción del deseo en el consumidor. En los estudios de publicidad, cámaras robotizadas capturan, en milésimas de segundo, el frescor producido por el contacto entre el agua y los productos alimentarios. Como metáfora de su distribución, frutas y verduras devienen imágenes en movimiento. BLOQUE 68 BLOQUE 69 DESCRIPCIÓN 17 ELECHA 19 La película sigue los flujos de imágenes y productos que dan forma a la logística alimentaria. Propone un recorrido por las carreteras, la maquinaria industrial del frío y los platós publicitarios, de manera que sitúa al espectador en el fuera de campo de nuestro menú diario. BLOQUE 51 NUMERO 04
BLOQUE 16 FLECHA 17 INULO 181 CA.CA.(CARNAVAL CANÍBAL) ELOUIE 18 EQUIPO 191 ELOUIE 19 Ca. Ca. es una criatura que (nos) digiere. Está ahí, aunque no la veamos. Es un ser monstruoso y cotidiano, descomunal y diminuto. Es un cuerpo de cuerpos formado por un laberinto de organismos, arquitecturas, artefactos, infraestructuras, territorios, paisajes, geologías, tecnologías, cajas negras, residuos, chatarras, biota, microbiata, estómagos, intestinos, microplásticos, gases, fósiles, lodos, procesamientos orgánicos e inorgánicos, transacciones, cotizaciones, regulaciones, creencias, mitos, fantasmas Es una coreografía imposible de abarcar, porque se despliega en un proceso de procesos oscoitécnicos interdependientes. Tiene múltiples agencias y escalas, de la territorial a la microbiana, de la planetaria a la de una miguita de pan, desde la cósmica hasta la molecular. Opera en ciclos politemporales que conectan situaciones ancestrales con ritmos ordinarios, tiempos profundos con futuros próximos, dinámicas de desecho con procesos coloniales. Habita en la tierra bajo nuestros pies, en nuestra tripa, en redes de tentáculos biotecnológicos. Vivimos dentro y fuera de Ca. Ca. Nos atraviesa. Es un ente metabólico y dinámico cuya materia está en constante metamorfosis, descomposición, procesado y transmutación. Es una digestión de digestiones que no cesa de intercambiar(se), interrelacionar(se), (des)ensamblarse con otros. Hace y padece. Transforma cada deshecho en un hecho, lo infructuoso en fértil, lo urgente en indiferente. Y viceversa. Es exuberante y fecundo, repugnante y peligoso. Regula nuestra salud, nuestro confort, nuestros marcos de convivencia, nuestra economía. Se resiste a ser representado y, a la vez, es un teatro y un fetiche. Es misterioso,	ELECHA CA EPISODIO CUATRO: PRODUCTION ELOUE 52 Zw Aunque nuestras ciudades solo ocupan una pequeña fracción de la corteza terrestre, los paisajes operacionales necesarios para sostenerlas pueden abarcar vastas extensiones de territorio. En España, por ejemplo, esa superficie ocupa más de 23 millones de hectáreas, lo que supone casi la mitad del territorio nacional. Este capítulo se centra en los paisajes que alimentan nuestras ciudades y en las arquitecturas y dinámicas que posibilitan su duel territorio nacional. Este geografías productivas, tiene lugar una compleja y dinámica interacción de cuerpos -territoriales, humanos, animales y mecánicos-, cada uno de los cuales desempeña un papel fundamental en una polifacética danza interescalar. Es en este escenario donde la colonización del suelo converge con cuestiones de revisión urgente, como la instrumentalización animal o la explotación de la mano de obra inmigrante. ELOQUE 54 ELOQUE 53 DESCRIPCION 18 ELOQUE 55 MANUEL CORREA + MARINA OTERO VERZIER El paisaje almeriense lleva la impronta de los procesos de terraformación ejecutados en España por el régimen franquista. Las arquitecturas de los pueblos de colonización y los proyectos de infraestructuras construidos en la época representan los medios por los que los cuerpos se convirtieron en trabajadores y los paisajes, en recursos a explotar. Su lógica perdura hasta hoy y es visible en la vasta red de invernaderos que ocupan cientos de kilómetros, donde se
pero real; imaginario, pero material; invisible, pero omnipresente. Es una inteligencia heterogénea que desborda cualquier creencia de excep- cionalismo humano. Ca. Ca. es un carnaval caníbal. ELCOULE ZI NÚMERO 02 ELCOULE ZZ EPISODIO DOS: CONSUMPTION ELCONDE ZI Nuestras cocinas son campos de batalla; mucho más que un espacio para cocinar y preparar comidas, son un lugar de profundo significado social y político donde se construyen nuestras realidades sociales. En ellas asistimos a la normalización de los roles de género, del trabajo doméstico, de las estructuras familiares e incluso de las tipologías arquitectónicas. Sin embargo, si repensamos estos laboratorios domésticos, podemos liberar su potencial como herramientas para construir imaginarios alternativos y forjar nuevos modelos de comunidad y colectividad. Este capítulo profundiza en el poder de la cocina como lugar de transformación política y social y en cómo su redefinición puede desafiar las normas y jerarquías establecidas, creando así estructuras sociales y ecológicas más justas y equitativas. ELCOULE ZA ELCOULE Z5	producen los alimentos que nos sustentan: tomates, calabacines, pimientos, sandías Las pieles plásticas de los invernaderos arropan los cuerpos de quienes trabajan sin descanso al servicio de la cadena de producción. Cada uno está especializado en operaciones discretas pero interrelacionadas: plantación, polinización, control de plagas y recolección. Absortos en la familiaridad de sus tareas, crean una coreografía que se practica cada día donde se producen los abejorros; en las hileras de calabacines donde se trabaja con movimientos manuales repetitivos, con obreros estimulados por bebidas energéticas; en las naves industriales donde se clasifican los tomates; en los lugares que acumulan pieles arrugadas y cansadas, antes invernadero. Frente a la tendencia de la automatización a moldear a los trabajadores en seres disciplinados, sus danzas revelan los cuerpos como la encarnación de un medio generador de conocimiento, lugares de agencia y de deseo.
ELCHE C	de uestras despensas. Las tramas microscópicas que ocurren en este reino velado son macroscópicas en escala y alcance, y su estudio puede sor la clave para lograr un sistema alimentario más resistente, más distribuido, más diverso y más costentible que el que hemos concoido hasta ahora.
